Industrial Grade Copper Anti-Seize Compound Lubricant Paste Stock No. B-00173

**Brush-Top
Applicator**

BTS Copper Anti-Seize Compound & Lubricant Paste combines a high concentration of copper enhanced with graphite in a blend of premium grade synthetic thickened petroleum based grease. BTS B-00173 insulates dissimilar metals from self-generated galvanic corrosion to prevent seizing and galling at high temperatures and pressures. This ensures long-term protection and easy removal of parts that have been subjected to adverse conditions. BTS Anti-seize lubrication also helps prevent binding to allow for proper torque during assembly.

V.O.C.: Compliant with all U.S. State and Federal Regulations
